```java
class Student {
    int id;
    String name;

    // Constructor
    Student(int i, String n) {
        id = i;
        name = n;
    }

    // Method
    void display() {
        System. out. println(id + " " + name);
    }

    public static void main(String[] args) {
        Student s1 = new Student(1, "Arun");  // object
        s1. display();
    }
}
```

Output

1 Arun

Back   Copy
